# SYNTRAN® ECO RB1

Microplastic-free natural wax

ZSCHIMMER & SCHWARZ

# SYNTRAN® ECO RB1

## Microplastic-free natural wax

Sustainability and performance are two of the key criteria for Zschimmer & Schwarz when developing new tailor-made solutions. Our new SYNTRAN® ECO line offers innovative solutions which fulfil the requirements of stringent regulations and meet ecological demands.

Discover SYNTRAN® ECO RB1, our newest development which increases the mechanical resistance of floor polishes.

SYNTRAN® ECO RB1 is a non-ionic emulsion of a rice bran wax designed for floor care applications. It provides very good resistance against scuff as well as black heel marks and reliably prevents slipping. SYNTRAN® ECO RB1 is easy to incorporate and shows good compatibility with other water-based acrylic SYNTRAN® polymers.

Based on a natural wax and free from microplastics, it is a good alternative to synthetic polyethylene waxes.

---

### BENEFITS

- ▶ Natural wax
- ▶ Microplastic-free
- ▶ High percentage of bio-based content
- ▶ Easy to formulate
- ▶ Very good scuff resistance
- ▶ Very good slip resistance
