

FLOOR CLEANER, ANTI-ODOUR WITH POLYMER

CSW_03-02-12

Type:	Floor cleaner with odour-reducing surfactant and polymer which reduces tackiness on surfaces
Appearance:	Clear, colourless liquid
Active matter:	Approx. 9 %
pH (10 %):	Approx. 7

Formulation:

Ingredients	Description	Function	Concentration
Water			77.4 %
LUMOROL VC-E 4376	Blend of nonionic surfactants	Excellent wetting, cleaning and grease-dissolving	5.6 %
ZETESECO HS 100	Sodium capryloyl glutamate	Low-foaming and hydrotropic, improves cleaning effect and reduces bacterial growth	1.0 %
SYNTRAN® 1560E	Acrylic copolymer	Protects floor from resoiling and reduces tackiness	16.0 %
Perfume, dye and preservative			q. s.

Manufacturing process:

- ▶ Consecutively add each component in the order indicated above and mix until homogeneous before adding the next one.

Application:

For wet cleaning of all flooring materials which are resistant to water and the above-mentioned pH. The cleaner has excellent wetting and cleaning properties. ZETESECO HS 100 prevents the formation of bad odours. SYNTRAN® 1560E reduces tacky residues after cleaning and forms a temporary resin layer that protects the surface from dirt and stain penetration. Dilute the cleaner with water. Recommended application concentration: 2–5 % of the cleaner in water, depending on the degree of soiling.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions, they can serve only as a guide, and are therefore offered without obligation. We ask that the possible rights of third parties are observed. Existing laws and regulations must be observed, particularly in regard to manufacture, placing on the market, handling and application of the product formulated according to this guide formulation!
