TISSOCYL ECO-WASH S

The ECOLUTION of synthetics washing

The special nature-based detergent TISSOCYL ECO-WASH S contains natural microparticles that are capable of absorbing oily substances. This enables the efficient cleaning of synthetic products.

Compared to conventional detergents, TISSOCYL ECO-WASH S is characterised by a considerably lower COD and BOD content, which helps protect our environment.

BENEFITS

- ▶ Excellent emulsifying of mineral and silicone oils
- ▶ Oil-absorbing effects caused by natural microparticles
- ▶ Very low foaming
- ▶ Low COD and BOD values
- ▶ Reduces carbon footprint

ECOLOGICAL ASPECTS OF THE USE OF TISSOCYL ECO-WASH S

- ▶ Reduction of wastewater load due to low COD and BOD values:
COD 262 mg O₂/g product
BOD 63 mg O₂/g product
- ▶ Organic components are readily biodegradable
- ▶ Not dangerous to aquatic organisms (WHC 1)
