

LEATHER AUXILIARIES

AUTOMOTIVE LEATHER

The right product for every task

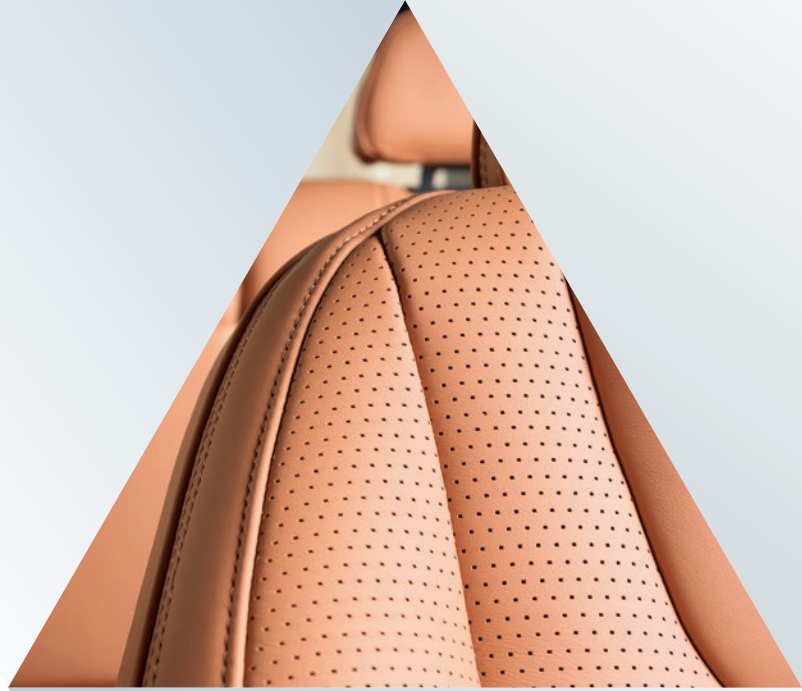

ZSCHIMMER & SCHWARZ

AUTOMOTIVE LEATHER

The right product for every task

Our application technicians listen attentively to our customers: which tasks they face and what kinds of solutions are required. Professional skills in leather technology and chemistry as well as a state-of-the-art application laboratory result in product innovations that withstand even the hardest production conditions at our customers' sites.

A low-temperature vacuum dryer as well as an electronically controlled milling drum with a humidity control system are part of the fundamental equipment of our experimental tannery. All test series are run close to production standards and evaluated with a specially developed software.
