

LEATHER AUXILIARIES

# TAFIGAL P

Auxiliary for improved fullness,  
tightness and cutting yield

ZSCHIMMER & SCHWARZ

# TAFIGAL P

Auxiliary for improved fullness, tightness and cutting yield

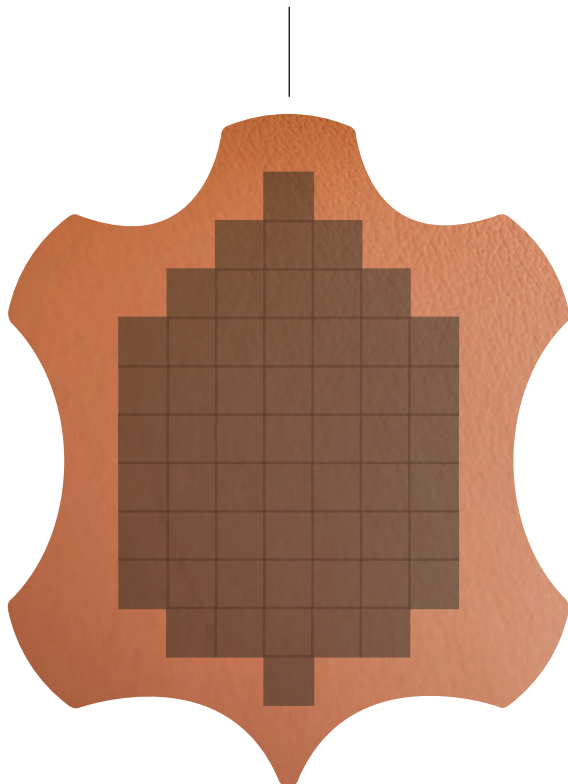

TAFIGAL P is mainly used for chrome-tanned leathers regardless of the kind of tannage. TAFIGAL P deposits in the loose parts of the skin as well as between the grain and reticular layer, thus improving firmness, fullness and grain tightness. In the parts of the skin which show a lower fibre density, TAFIGAL P creates additional reactive groups.

---

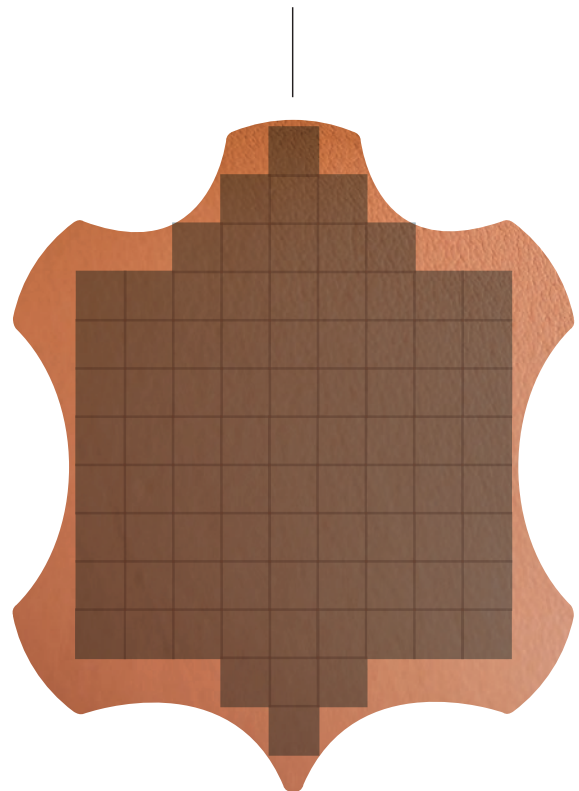

## BENEFITS

- ▶ Increases cutting yield by 3–10%
  - ▶ Better quality consistency throughout
  - ▶ Improves grain tightness
  - ▶ Easy to use from pickling to dyeing
  - ▶ Smooth grain and deeper dye shades
- 

WITHOUT TAFIGAL P

WITH TAFIGAL P

With TAFIGAL P, a significant improvement of the cutting yield can be achieved.
