

**LEATHER AUXILIARIES**

THE RIGHT PRODUCT  
FOR EVERY TASK

**ZSCHIMMER & SCHWARZ**

# LEATHER AUXILIARIES

Stable and sophisticated, malleable and versatile: leather always lends shoes, jackets, sofas, handbags, accessories and car seats a very special touch. To give the material its universal processing characteristics and unique features, such as softness, fullness, texture and robustness, we offer a unique range of both high-performing and environmentally friendly fatliquors, tanning agents, surfactants and special auxiliaries.

Our products allow the economical and ecological production of any type of leather from standard to the highest demands using any kind of raw material. The scope of possible applications ranges from highly technical automotive leather to fashionable shoe and clothing leather to classic handbags and gallantry items.

With our many years of experience, individual consulting and our traditional closeness to the leather and fur industry, we ensure that our innovations are optimally tailored to the needs of our customers and the requirements in their target markets.
